NYLON CASTERS - THE INSIDE STORY

**CUSTOM
COLORS**

**3" TO 6" WHEEL DIAMETER
MODELS NOW AVAILABLE**

COMPETITOR Y

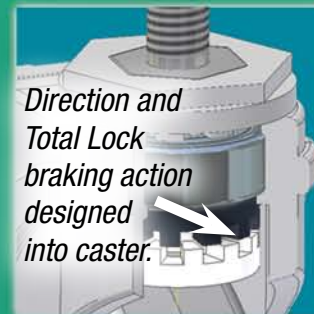

Double ball bearings works great with metal casters ... but can lead to premature wear of the raceways and increased shimmy on plastic models.

COMPETITOR Z

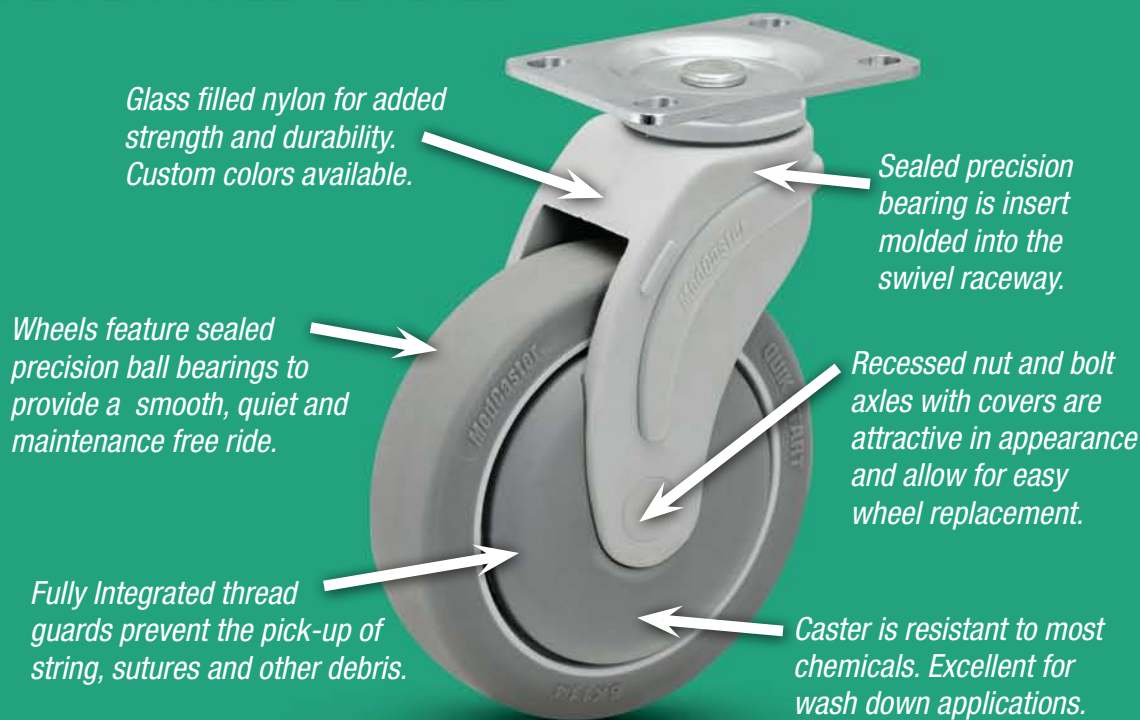

Friction ring attachment design wears directly on the plastic race which can increase shimmy and in many cases the stem can come out of the caster causing a catastrophic failure.

MEDCASTER

MedCaster NG series has a precision sealed ball bearing raceway design for long lasting, smooth, quiet, maintenance free ride. Precision ball bearings are insert molded into the swivel raceway. This design allows capacity to be similar to or in some cases greater than metal casters.

PERFORMANCE FEATURES

YOUR CHOICE OF PERFORMANCE OPTIONS
